SUMMARY

Dynamic Full Stack Developer with 1 year of experience in delivering scalable digital solutions. Developed a fully digital property management app, enhancing client processing by 60% and reducing UI defects by 35%. Seeking opportunities to leverage skills in React, NextJS, NodeJS, and AWS to drive innovation and optimize digital experiences.

EXPERIENCE

Freelance Full Stack Developer

Dapton Technologies

March 2025 - Present, Pune, India

- Contributed to multiple web applications and SaaS products, collaborating on architecture, development, and deployment.
- Developed full-stack solutions using **Next.js**, **NestJS**, **Supabase**, and **AWS**, ensuring high performance and scalability.
- Built modular UI components with **Framer Motion** and **Tailwind CSS**, improving design consistency and maintainability.
- Integrated APIs such as **Razorpay**, **Calendly**, and **Gemini AI**, automating workflows and enhancing user experience.

PROJECT

Pix-Videos.com – Creative Portfolio & Booking Platform

Dapton Technologies • [pix-videos.com](#) • September 2025 - Present

- Developed a lightweight, high-performance portfolio and booking website for video professionals, achieving **95+ Lighthouse** performance scores.
- Integrated Calendly API for automated client booking and scheduling, reducing manual coordination time by **50%**.
- Optimized static generation and caching in Astro, reducing initial load times to under **1.2 seconds** on mobile.
- Implemented responsive layouts and SEO-optimized metadata, boosting organic visibility and user engagement metrics.

DocuProp.com – Digital Property Management Platform

Dapton Technologies • [docuprop.com](#) • March 2025 - Present

- Developed and maintained a full-stack digital property management web app with tenancy workflows, document generation, and eSignature automation, improving client processing speed by **~60%**.
- Implemented secure multi-signer eSignature flow using BoldSign API and custom status tracking, enabling 100% digital tenancy agreements.
- Built modular front-end components in Next.js with Framer Motion and Tailwind CSS, enhancing UX consistency and reducing UI defects by **35%**.
- Integrated Supabase for authentication, storage, and real-time database management, achieving near-instant sync across tenant dashboards.

Brainion – AI Powered Second Brain

[brainion.xyz](#) • January 2025 - Present

- Architected and deployed a productivity web app supporting AI-powered semantic search, increasing search accuracy by **85%**.
- Engineered scalable backend using Prisma and PostgreSQL with **<200ms query latency**.
- Integrated **Gemini AI** for contextual understanding, improving data retrieval performance and usability.
- Built responsive UI with Tailwind CSS, reducing render times by **30%** and enhancing cross-device consistency.

CMPCT – SaaS Link Shortening Platform

[cmpct.in](#) • October 2024 - Present

- Developed and deployed a SaaS URL shortener with tiered subscriptions and RazorPay integration, gaining 100+ users within the first month.
- Reduced server response time by **40%** through caching and API optimization.
- Implemented JWT-based authentication and rate-limiting for security and scalability.
- Automated deployment pipeline via AWS EC2 + NGINX + PM2 achieving **99.9% uptime**.

EDUCATION

Bachelor of Computer Applications (BCA)

Bharati Vidyapeeth Deemed University • Navi Mumbai • 2012 – 2015

SKILLS

React.js, Next.js, Tailwind CSS, HTML5, CSS3, Framer Motion

Node.js, Express.js, PostgreSQL, MongoDB, Prisma ORM, JWT Auth

AWS (EC2, S3), NGINX, PM2, Vercel, CI/CD Pipelines

Gemini AI API, Razorpay API, RESTful APIs, Zustand, Postman

JavaScript, TypeScript, Java, Kotlin
